

Appendix 3 - IMS Policy

Integrated Management System Policy:

Integrated Management System Policy

Watters Electrical specialises in designing, managing projects, installing, and maintaining electrical, fire, solar, telecommunications, and IT network services.

Our objective is to provide high-quality, safe, and timely products and services that align with customer needs, regulations, and codes. Client expectations for secure, reliable, cost-effective solutions drive us.

We wholeheartedly commit to upholding an ISO 9001:2015 and ISO 45001:2018 (MP40) standards-based management system, encompassing Quality Assurance, Occupational Health, Safety, and Rehabilitation. We integrate the National Code of Practice and Industry Guidelines into our Watters Company Management System.

Every managerial individual bears personal responsibility for health and safety, being accountable for hazard management within their domain.

Our adaptable environmental approach, tailored to project specifics, ensures compliance through continuous training and awareness for all employees.

Efficiently tackling management, safety, and environmental issues with technical proficiency is our focus. We allocate both human and technical resources to prevent shortcomings, aligning with our goal of "right first time - every time," while striving for continuous enhancement.

Personnel at all tiers contribute to our system's success. Our dedication to effective management, safety protocols, and environmental control guarantees company prosperity, satisfying both clients and staff.

Our systems and safety management team is authorised to ensure compliance. Any interdepartmental or personnel disputes beyond resolution will be escalated for final adjudication.

Watters Electricals' Integrated Management System Policy underscores our unwavering commitment to quality, safety, and environmental responsibility.
